

**GeoAssistance SARL**  
**Letter of recommendation**  
**from GBP Petroleum plc**  
**21 January 2009**

GBP Petroleum (GBP) have used the logistical services of GeoAssistance SARL for three field trips from Rabat to their onshore license in and around Agadir. For this work GeoAssistance were commissioned to hire quality and safe 4WD vehicles, safe and competent drivers, book hotels and handle all other field related requirements, such as GPS readings and sample collecting.

In every case the operations ran entirely to plan, safely and without incident, despite visiting remote and sometime difficult to access regions. Money matters were professionally handled, again without any issues. Through their expertise, GBP now have contacts with university based geological experts who continue to provide guru services as needed. GeoAssistance also act for GBP in contacts with ONHYM and are their facilitator for exporting geological samples for analysis in the UK.

Further field trips and operational activities are now being planned and GeoAssistance will again be asked to provide logistical services.

I, therefore, have no hesitating in recommending the services of Youssef Azirar and Mustapha Bakkal of GeoAssistance SARL.
